Right to work: Full-time work rights; Graduate Route (PSW) application submitting October 2026

PERSONAL PROFILE

AI & Automation Engineer graduating with a BSc in Computing with Artificial Intelligence Technology (Northumbria University), with a full-stack background and hands-on experience delivering live business automation. Currently building and maintaining an Autotrader Partner API integration that automates stock, pricing and lead-sync workflows for a live dealership, alongside academic ML projects spanning predictive modelling, NLP and forecasting. Comfortable across the full stack - Python/FastAPI backends, React frontends, Docker deployment - and looking for a graduate or junior role building integration, workflow and AI-automation solutions.

PROFESSIONAL EXPERIENCE

IT Manager - Asahi Motors, London, UK
February 2026 - Present

- Leading development of an internal stock management system integrating with the Autotrader Partner API, automating stock listing updates and lead retrieval and replacing manual data entry across sales channels.
- Designed and implemented a structured, repeatable workflow for processing inbound lead data across multiple digital platforms, improving response speed and data consistency.

Associate Lead Software Engineer - Enfection (Pvt) Ltd, Sri Lanka
March 2023 - December 2025

- Led front-end standards, mentoring and code reviews for a 4-6 member team, improved delivery quality through Git workflows and CI automation.
- Implemented accessibility, SEO and Core Web Vitals optimisation using component-level performance budgets, CDN and caching. Tech: React, Vue.js, JavaScript (ES6+), WooCommerce, GSAP, Tailwind.

Full Stack Developer - Owiro Holdings, Colombo, Sri Lanka
April 2022 - December 2022

- Managed DigitalOcean hosting and mail servers; automated deployments.
- Built Moodle LMS features and React tools; delivered SEO/speed-optimized WordPress sites.

Volunteer Software Engineer - National Health Informatics Unit, Sri Lanka
January 2021 - January 2022

- Contributed to COVID-19 health informatics modules and data dashboards for public health reporting.

PROJECTS

FarmSense AI - Intelligent Crop Planning & Market Intelligence Platform (Dissertation Project)
Technologies: Python, FastAPI, scikit-learn, TensorFlow/Keras, HuggingFace, PostgreSQL, Docker, React (Vite)

- Building an end-to-end AI platform for smallholder farmers.

CryptoAgent - AI-Powered Trading Decision Engine

Technologies: Python, FastAPI, React/Tailwind, PostgreSQL, CCXT, Docker Compose

- Designed a two-layer automation system, a live market-data layer.

TCI NGO Website

Technologies: WordPress classic theme, GSAP/Scroll Trigger

- Delivered accessible, animation rich interface, configured Rank Math Pro SEO, deployed on AWS.

Buyrocell.com - E-Commerce Platform

Technologies: Laravel, PHP, MySQL, Bootstrap, JavaScript

- Developed a complete e-commerce platform for tiles, bath ware, and accessories with a custom product catalogue, order management, and responsive UI.

KEY SKILLS

- **AI / Machine Learning:** Python, scikit-learn, TensorFlow/Keras, HuggingFace, pandas, NLP (VADER, TextBlob), Random Forest, XGBoost, LSTM
- **Automation & Backend:** FastAPI, REST API integration & automation, Docker, Docker Compose, PostgreSQL
- **Frontend**: React, Vue.js, JavaScript (ES6+), HTML5, CSS3/SASS, Tailwind, Bootstrap, GSAP, Framer Motion
- **DevOps/Cloud**: Git/GitHub, AWS, DigitalOcean, Railway, CI/CD, Docker, MLOps basics, cPanel/aaPanel
- **Tools/Practices**: Google Colab, Figma, Illustrator, Jira, SEO, performance optimisation, accessibility

---

EDUCATION

BSc Computing with Artificial Intelligence Technology **Expected September 2026**
University of Northumbria, London Campus

Higher National Diploma in Information Technology (HNDIT) **May 2019 - April 2022**
Software Engineering focus
Sri Lanka Institute of Advanced Technological Education (SLIATE), Sri Lanka.
